## *Understanding Teen Perspectives on School Harassment: A Quantitative Study*

---

### Introduction

Hello!

My name is Jesea Kuya, and I am conducting a study on school harassment to better understand the experiences and perspectives of teenagers aged 15 to 18. Your responses will help shape initiatives to combat bullying and make schools safer. This survey will take about 5 minutes to complete and is anonymous.

Thank you for your time!

---

### Objective

To collect quantitative data on teenagers' awareness, experiences, and perceptions of school harassment to identify trends and confirm hypotheses.

---

### Hypotheses

1. Most teenagers believe digital harassment (cyberbullying) is more prevalent than physical bullying.
  2. Students feel their schools are not equipped to effectively handle bullying cases.
  3. Peer-led support systems are perceived as more effective than teacher interventions.
